

Sidney Fults

The GREATEST thing about 2009 is its great Technology! My name is Sidney Fults and if you are reading this then it is someone in the Future. Also if you are reading this then you have found the time capsule let me tell you what I put in here and why. The first thing I put in here is a type writer the second thing I put in is a DVD player. The last thing I put in is a play station2.

These are the things I think should be in a time capsule. The reason I chose the typewriter is that in the past they used typewriters, but there are not many left in the world. See back in the 1800s & 1900s they used typewriters; they didn't know what a computer was. The typewriter had buttons and when you started to type on the typewriter it was very slow. Typewriters were very useful. They made newspapers, made letters, and lots of other things. Well, that is all for the typewriter lets move on to the DVD player. A DVD player is something that you watch movies on. You can't find many DVD players either. A lot of people use Blue Ray; Blue Ray is like a DVD player it is just blue and the Discs are different. DVD players are put in good use, like for schools. They use DVD players most of the time, and a lot of people use DVD players. They are very good; they play all kinds of movies. Well ENOUGH of DVD players. Let's talk about play station2. A play station2 have a lot of games, and are very FUN! You can't really find a lot of play station2s. They have almost every game you can think of. Play station2s are very neat. They have a lot of memory. They can be put in little places like on a TVs and many more places. A lot of children have Xboxes, play station3s, DS's, but not many people have play station2s, so that is why I picked a play station2s. The things I picked have very good value to me and many others. Typewriters, DVD players, and Play station2s all have something the same, it is that you can't really find them any more and I know what they are. A lot of children will never know what a typewriter, DVD players, or Play station2s are. A small old person if still alive from the past will tell you about these things. THE END
